

# BRING PGA-LEVEL TECHNOLOGY

to your next tournament or outing

Dialed in Golf Solutions has partnered with TrackMan Golf to bring a PGA-like practice and play experience to local golf tournaments, outings, scrambles, corporate & member events.

# Attention Golf Event Planners

## Increase your exposure with Dialed in Golf Solutions

TrackMan Golf, the creator of the most accurate launch monitor on the market, has released new, cutting-edge software called TrackMan Event.

TrackMan Event was developed to use during Pro-Ams on the PGA Tour to give amateurs an additional taste of tour life, and now, it is used at every PGA Tour Pro-Am! Maybe you've seen it at the Valspar Championship, the Arnold Palmer Invitational, or The Players Championship.

Each golfer will receive data on the course like carry distance, total distance, ball speed, and club speed. At the end of the tournament, each golfer will receive a customized report that includes: 2 multi-angle videos of their swing, 9 key data parameters and a leaderboard showing distance, club speed and ball speed.

**Most importantly, it doesn't slow down the pace of play!**

And now, TrackMan Event is available to you for any golfing event exclusively from Dialed in Golf Solutions. This means that you can use this software for your club as a very cool value-added or serious fundraiser and revenue generator. DiGS' professional staff will work with you to include multiple sponsor mentions with bios and hotlinks.

Our services are popular at Member/Guests, charity events, corporate outings, and indoor company functions. All skill levels, from the novice to the scratch golfer, will enjoy this feature. Now sit back and watch golfers and sponsors alike rave about this value-added service!

**CALL DiGS TODAY TO BOOK  
YOUR EVENT AT (727) 687-9111!**

### Branding and Revenue Generator

Brand yourself and your sponsors

Get noticed when and where it matters:

- Your event logo + Name
- Your main Sponsor
- Additional Sponsors

TrackMan 4 has radically transformed the way radar technology is applied in golf today. Using two radar systems instead of one to obtain maximum data quality and increased pick up rates. TrackMan 4's Dual Radar Technology is a significant milestone in the evolution of launch monitors, golf instruction, coaching, fitting, and entertainment.

Live demonstrations are available at your location or ours please contact us at:
